

# Portfolio Management Analysis

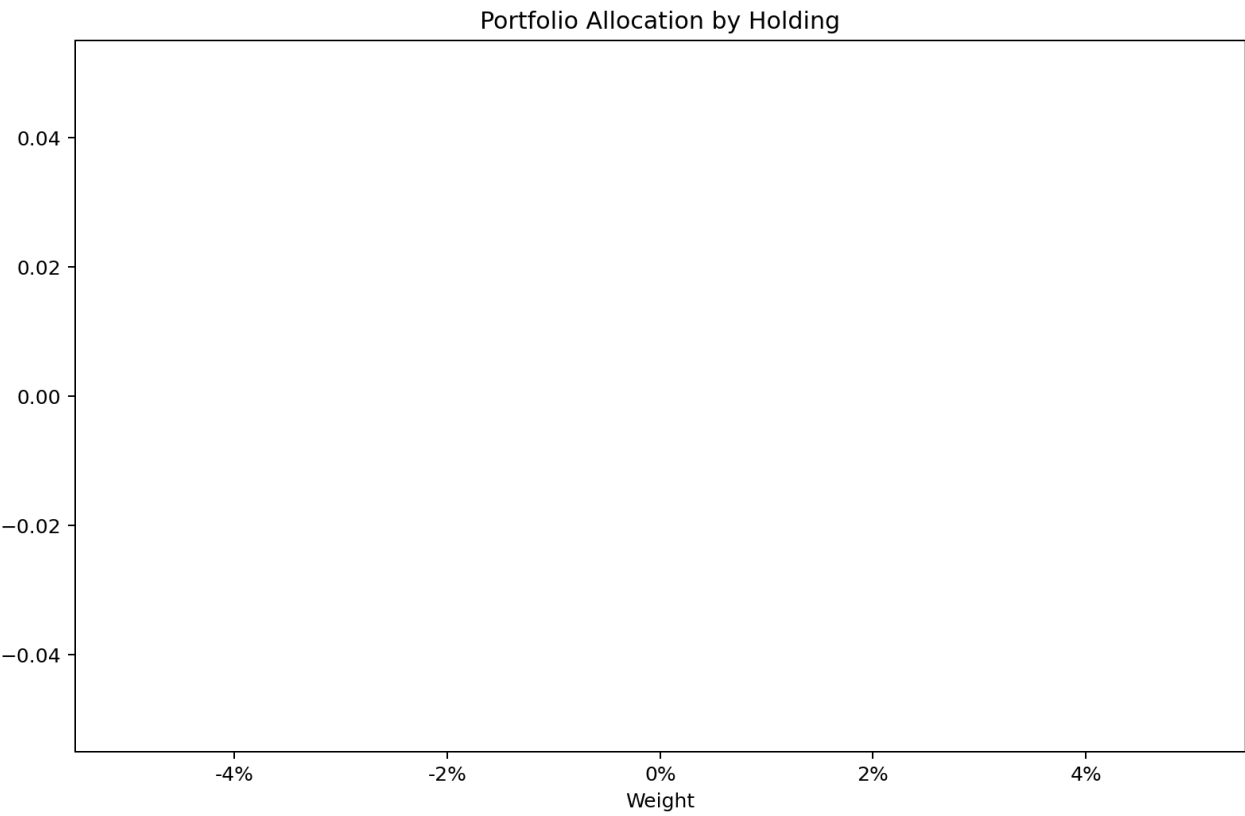

## Simulated portfolio vs Nifty benchmark

| Metric                      | Value      |
|-----------------------------|------------|
| Initial Portfolio Capital   | ■100.58 Cr |
| Portfolio Cumulative Return | 2.10%      |
| Benchmark Cumulative Return | 1.84%      |
| Relative Performance        | 0.26%      |
| Beta (10-day sample)        | 0.779      |

## Portfolio vs Benchmark

# Portfolio Allocation

## Risk and Methodology Notes

The corrected model uses the actual █100.58 Cr holdings total and statistically calculated beta. The source workbook had a CAGR-ratio column labelled Beta; this was not treated as beta in the corrected analysis. Only ten daily observations are available, so annualized performance and Treynor metrics are illustrative rather than long-term estimates.
